

SEI Project #1 Pitch

Brianna Groden

October 1, 2021

Project Proposal

App Title:

Hair Haven Salon

App Description:

Business website for local
salon

Application Programming Interface

API:

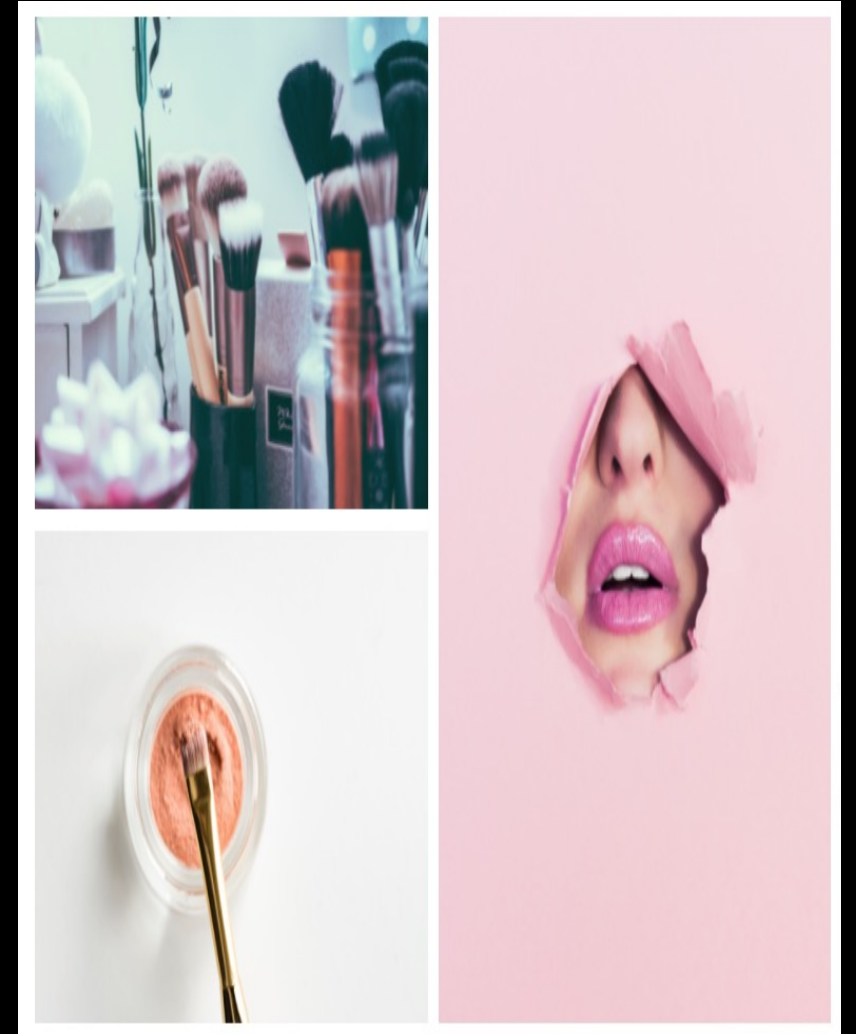

Makeup API

Link:

<http://makeup-api.herokuapp.com/api/v1/products.json>

Purpose:

API will serve as resource content for images of available retail at the salon or an inspiration/inspo block of the page.

API Snippet

Logo and navigation

About Block

Business website for local salon

“Our Team” Block

Images with names

“Our Work” Block

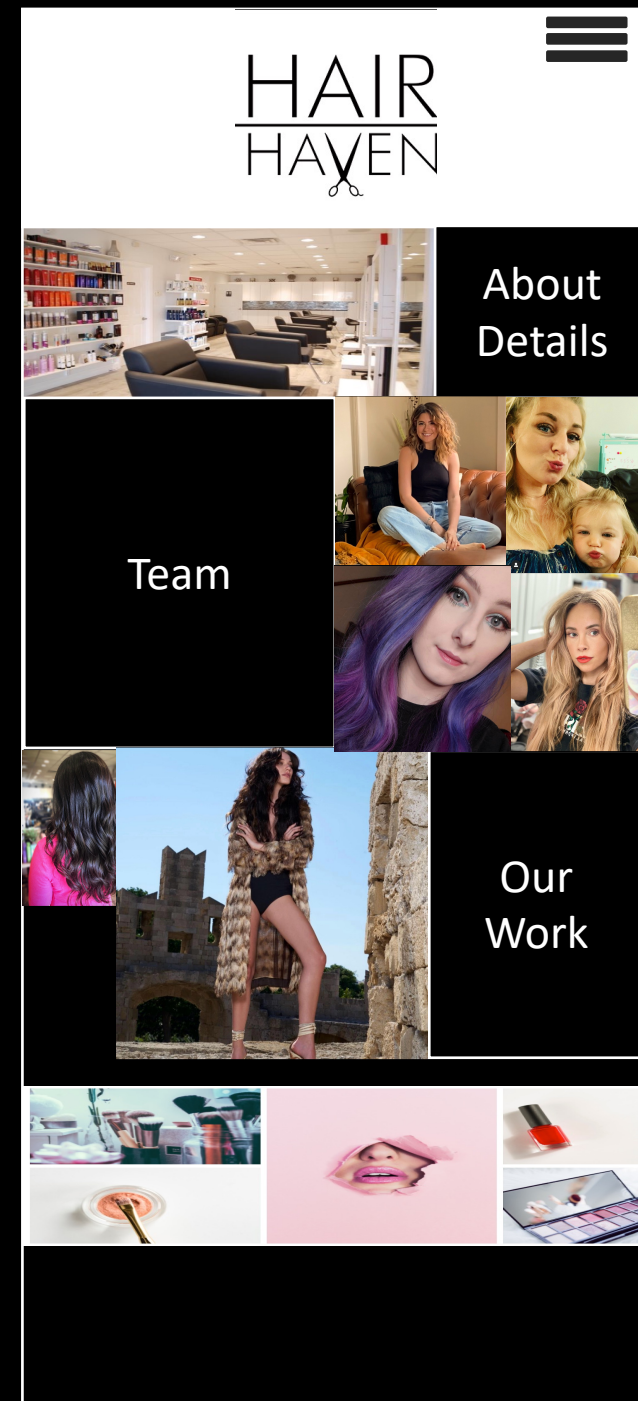

Images with names

“Retail” Block

Images of available retail build from API

Footer

Include hyperlink of IG logo to salon instagram

Minimum Viable Product (MVP)

- Built with HTML, CSS and JavaScript
- Styled using Flexbox or Grid
- Use fetch to make a request to an external data source and insert some of the retrieved data on to the DOM
- Implement responsive design using at least one media query/breakpoint
- Deploy sit on Github Page (<https://bgcuse603.github.io/HairHaven/>)
- At least 30 commits
- A README.md that contains your project worksheet, link to live, deployed site, and any necessary instructions

Post MVP

- Replace Make up API with actual Hair Haven Instagram API data
 - Swap “our work” block to images from IG API and “Retail Block” to stocked images.
- Add Email subscription box for salon to capture site visitor data
- Have hamburger bar navigation
- Have images in black and white and then go to color when user hovers with cursor
